

New glass has switchable views

AT HOME

The future has arrived and now there is an alternative to curtains, shades and blinds for most window applications.

Elmont Glass is now offering liquid crystal switchable privacy glass for instant changeable views at the flip of a switch.

Liquid crystals align with minimal power to allow light to pass, providing vision. Turn off the power and the glass blocks visibility and changes into private mode.

It's truly amazing. Everyone says, "WOW."

Low E options create energy efficiencies and offer laminated security and sound-proofing, as well as being available in colors and shapes. There are even tempered and bullet resistant applications are available

Glass is available for residential as well as commercial uses. Currently in use on the John Lennon Educational tour bus, the "Switchable Glass" creates isolation booths for on-board recording studios.

Laminated glass blocks 99 percent of harmful UV rays and protects people, fine furnishings and fabrics. The glass can be customized to almost any requirement and curved, bent and insulated.

New technologies available now are variable tinting, insulation and glass that darkens like sunglasses but all by a switch.

Radiant heat glass can be used where rooms have a chill, and is energy efficient

even comes with a thermostat for the ultimate creature comfort. This state-of-the-art product and cutting edge technology is available through glazing contractors, like Elmont Glass, who can make all these applications plug and play. Now shipping nationwide, Queens residents are lucky to have Elmont Glass close at hand for easy access to professional services.

Elmont Glass began business on the Queens border in 1949. Now expanded bysons Glen and Stuart, the company services the New York tri-state region with sales, service and cutting edge technology.
